

Demo Organic Fertilizer Application Log

Farm: Nông trại Phú Điền

Plot: Lô A1 - Đậu nành / Lúa Hè

Season: 2026 - Vụ Lúa Hè

Season ID: 19

Plot ID: 1

Record type: Nutrient Input Event

Input source: ORGANIC_FERTILIZER

Application date: 2026-04-23

Evidence reference: LOG-FDN-ORG-260423

Measured: TRUE

Data source: user_entered

Source type: USER_ENTERED

Nitrogen amount: 6.0000 kg N

Application context: Moderate organic fertilizer application to maintain soil organic matter.

Agronomic interpretation:

This record documents a measured/user-entered organic nutrient input. The organic fertilizer is used at a moderate level to maintain soil health without increasing

fertilizer dependency unnecessarily. It supports the sustainability score by showing balanced nutrient management rather than excessive external nitrogen input.

Note:

Happy path: duy trì nền hữu cơ ở mức vừa phải.
